PROFESSIONAL SUMMARY

Frontend Developer (4.9+ years) experienced in building performant, scalable web applications using React, Next.js, and JavaScript. Passionate about crafting pixel-perfect, accessible UIs and optimizing performance for high-impact products. Proven track record of driving UI efficiency, mentoring teams, and delivering quality releases in fast-paced startup environments.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), Redux, TypeScript, HTML5, CSS3, SCSS, Tailwind CSS, Material UI, Chart.js
Backend & DB: Node.js, Express.js, MongoDB, REST APIs
Tools & Platforms: Git, AWS, JIRA, VS Code

WORK EXPERIENCE

Software Development Engineer II | Nickelfox Technologies Pvt. Ltd., Noida *Jan 2022 – Present*

- Engineered and maintained scalable web applications using React.js, Next.js, and JavaScript
- Led a team of developers, providing technical guidance, conducting code reviews, and enforcing coding best practices.
- Optimized application performance and security across multiple client products, contributing to a measurable improvement in user retention metrics.
- Collaborated with designers, product managers, and stakeholders to ship high-quality features on schedule.

Software Developer Intern | Newton School of Technology *Jun 2021 – Dec 2021*

- Built interactive web interfaces using React.js, HTML, and CSS; consumed REST APIs to handle dynamic data fetching and rendering.

KEY PROJECTS

BiteTime – Food Catering App | *React.js, Next.js, Node.js, Redux, Material UI*

- Architected a full-stack catering management system with role-based access (Admin, Staff, Delivery), real-time order tracking, and secure payment integration.
- Expanded admin dashboard to support dynamic menu, pricing, and customer management — significantly reducing manual order processing time.

BlueVerse – Vehicle Wash Machine Portal | *React.js, Next.js, Redux, Material UI, Tailwind CSS*

- Engineered a centralized portal for live machine activity tracking, wash counts, and automated transaction reporting across multiple locations.
- Built interactive revenue and machine-efficiency analytics dashboards, giving operations teams clear visibility into daily throughput and performance trends.
- Enforced cross-browser compatibility and mobile responsiveness.

LoopHealth – Health Insurance Management | *React.js, Redux Toolkit, JavaScript, CSS*

- Built an insurance data platform managing employee health policy records, covering full lifecycle workflows for enrollment, modifications, and claim tracking.
- Executed dynamic multi-step forms with robust validation and error handling, substantially reducing data entry errors compared to the previous system.
- Improved global state architecture using Redux Toolkit, cutting redundant API calls and boosting overall application scalability.

IT Tracking System – Employee Issue Portal | *React.js, Next.js, Redux, Chart.js, Tailwind CSS*

- Designed a comprehensive issue tracking portal with priority tagging, full ticket lifecycle management, and structured resolution workflows.
- Applied Chart.js to build analytics dashboards tracking issue trends and SLA compliance, helping the team reduce average resolution time noticeably.
- Integrated a real-time notification system and role-based access control

EDUCATION

Bachelor of Engineering (BE) – Information Technology *Jul 2016 – Aug 2020*
Sigma Institute of Technology, Vadodara
