Software Developer Engineer

Experience : 4+ years

Software Developer Engineer with 4+ years of experience working on multiple complex web applications, specializing in building scalable, high-performance, and user-centric solutions using React.js, Next.js, and modern JavaScript frameworks.

Summary

- Software Developer Engineer with 4+ years of experience in building scalable and user-friendly web applications.
- Strong expertise in React.js, Next.js, JavaScript, Redux, HTML, CSS, and UI frameworks.
- Skilled in ensuring code quality, maintaining coding standards, and implementing best practices.
- Strong team player with the ability to collaborate effectively and also take ownership as an individual contributor.
- Proficient in optimizing application performance, scalability, and security to improve user experience.
- Proven ability to work with cross-functional teams including designers, product managers, and stakeholders for successful project delivery.

Experience

Software Development Engineer-II (Jan 2022 - present)

Nickelfox Technologies Pvt. Ltd., Noida

- Developed web applications using React.js, Next.js, and JavaScript for dynamic and responsive UIs.
- Conduct rigorous unit and integration testing to maintain application stability and performance.
- Lead a team of developers, providing technical guidance, conducting code reviews, and ensuring followed best practices.
- Collaborate closely with designers, product managers, and stakeholders to deliver high-quality software solutions.
- Optimize application performance, scalability, and security to enhance user experience.
- Mentor junior developers, fostering a culture of learning and continuous improvement.
- Able to work in dynamic environments and quickly pick up new technologies to stay ahead in evolving tech landscapes.

Software Developer Intern (June 2021 - Dec 2021)

Newton School of technology

- Learned and worked with React.js, HTML, and CSS to build interactive web applications.
- Gained experience in calling REST APIs and handling data fetching in frontend applications.
- Implemented mobile-responsive designs to ensure a seamless user experience across different devices.
- Worked on version control using Git, collaborating with the team on code updates and reviews..

Skills & Technologies

Frontend Technologies: JavaScript, React.js, Next.js, Redux, HTML, CSS, SCSS, MUI, Chart.js

Backend Technologies: NodeJS, Express

Familiar with: MongoDB, Git, AWS, Firebase, REST APIs, HTML, CSS

Platforms & Tools: VS Code, GIT, JIRA, Confluence

Projects

BiteTime - Food Catering App

Technology Stack: NodeJS, React.js, Next.js, Redux, Material UI

- Developed a full-stack food catering management system to streamline order processing and delivery tracking.
- Built real-time order status and pickup monitoring features to improve operational efficiency.
- Implemented secure online payment integration and automated transaction history management.
- Designed role-based access control for Admin, Staff, and Delivery Personnel.
- Developed dynamic admin dashboard for menu, pricing, and customer management.
- Optimized frontend performance and improved responsiveness across devices.

BlueVerse - Web Portal for Vehicle Wash Machine Management

Technology Stack: React.js, Next.js, Redux, Material UI, Tailwind CSS

- Developed a centralized web portal to monitor vehicle wash machine activity and usage metrics.
- Implemented wash count tracking and automated transaction reporting system.
- Designed interactive dashboards for revenue insights and machine efficiency analytics.
- Integrated secure authentication and role-based authorization.
- Ensured cross-browser compatibility and mobile responsiveness.

LoopHealth- Health Insurance detail management

Technology Stack: ReactJS, CSS, Redux Toolkit, JavaScript

- Developed an insurance data management platform for handling employee health policy records.
- Implemented policy enrollment, modification, and claim tracking workflows.
- Built dynamic forms with validation and error handling to enhance data accuracy.
- Improved user experience through optimized UI components and structured data flow.
- Managed global application state using Redux Toolkit for improved scalability.

IT Tracking System - Employee Issue Management Portal

Technology Stack: React.js, Next.js, Redux, Material UI, Tailwind CSS, Chart JS, CSS

- Designed and developed an issue tracking system for managing employee concerns and resolution workflows.
- Implemented ticket lifecycle management with priority tagging and status updates.
- Built analytics dashboards using Chart.js to monitor issue trends and resolution performance.
- Developed real-time notification system for issue updates and follow-ups.
- Integrated role-based authentication and secure access control.

Education

Bachelor of Engineering (BE) in Information Technology (July 2016 - Aug 2020)

Sigma Institute of Technology, Vadodara
